

BEFORE PRINTING

BONDAID 1

Solvent-Based Adhesion Promoter for UV Curable Prints on Metal, Glass, and Tile

- ▼ Designed to improve adhesion on metal, glass and tile
- ▼ Acts as a general cleanser prior to printing
- ▼ Reduces static electricity on the surface
- ▼ Reduces ink drop deflection
- ▼ Reduces potential for new particles being attracted to the substrate during printing
- ▼ Always test the results of this product on your specific substrate using your application method prior to using in production
- ▼ 1 litre bottle

BONDAID 2

Solvent-Based Adhesion Promoter for UV Curable Prints on POLYCARBONATE

- ▼ Designed to improve adhesion on acrylic, Lexan and polycarbonate
- ▼ Act as a general cleanser prior to printing
- ▼ Reduces static electricity on the surface
- ▼ Reduces ink drop deflection
- ▼ Reduces the potential for new particles being attracted to the substrate during printing
- ▼ Always test the results of this product on your specific substrate using your application method prior to using in production
- ▼ 1 litre bottle
