

INX Digital Ink Train Warranty for Triangle® Inks

What INX Digital Warrants

INX Digital's Ink Train Warranty is granted by INX Digital to the original purchaser of Triangle® inks manufactured by INX Digital and to the end-user if the inks were purchased through an authorized member of Triangle's® Global Dealer Network.

INX Digital warrants that their Triangle® inks, when properly used in accordance with the terms and conditions of this Warranty, shall not cause damage to the ink train of the printer of their intended use.

"Ink Train" for the purpose of this warranty is defined as the wetted parts of the printer, to include the filters, dampers and print heads.

Guarantee Against Performance Failure

In the event that the Triangle® inks manufactured by INX Digital fail to perform as guaranteed in this warranty, INX Digital and/or its authorized agent or distributor will replace the damaged wetted parts of the printer (or issue a credit for this component where, at INX Digital's sole discretion, replacement is not reasonably possible).

All statements, technical information and recommendations about INX Digital products are based upon tests believed to be reliable but do not constitute a guarantee or warranty. All INX Digital products are sold with the understanding that Purchaser has independently determined the suitability of such products for its purposes. It is expressly agreed and understood that INX Digital's sole obligation and Purchaser's exclusive remedy under this warranty, or under any other warranty, express or implied or otherwise, shall be limited to servicing (replacement or repair) of the affected wetted parts of the printer if the proper claim process is followed and it is found that INX Digital's Triangle® inks are the sole cause of the failure.

Notification of Claim

This Ink Train Warranty requires that INX Digital and/or its authorized Triangle® agent or distributor be notified in writing of any claims within three (3) days of suspected failure.

In order to make a warranty claim, the proper escalation procedure must be followed:

- Completed TS1 form submitted to the authorized Triangle® dealer through whom the inks were purchased along with supporting photographs, test prints or other documentation that will assist INX Digital in the evaluation of the issue submitted with the TS1
- TS1, TS2 and TS3 (where appropriate) submitted
- A documented TS issue must be created (done after customer submits a completed Tech Support form via the Triangle® website)
- Documentation of printer OEM and INX Digital preventative maintenance suggestions
- Completed Proof of Ink Conversion and Warranty Registration Form (see Appendix A)

INX Digital reserves the right to inspect all reported claims. Failure to comply constitutes a waiver of all rights under this Ink Train Warranty.

With required documentation, all settlements first require the approval of the INX Digital President. With approval, service will be provided or credit will be given to the appropriate customer account as per the terms of this warranty.

Prior to beginning any conversion to Triangle® brand ink a pre-conversion set of reference prints (nozzle test/test draw and benchmark print) must be printed to submit with this completed form for warranty registration.

In cases where the ink series being used is both Color Compatible and Chemically Compatible with the OEM, and the ink conversion is occurring one or two colors at a time, a post-conversion set of prints may not be available. **There is a transition period while both OEM and Triangle® brand inks are running on the printer. Until the printer is fully established on Triangle® brand ink, any failure with the ink train components where the ink is found to be the cause of the failure, the cost will be equally shared between INX Digital, their authorized Triangle® dealer, and the customer.**
